

REXAM

healthcare

we put patients first

Rexam is a leading global consumer packaging company.

Rexam Healthcare provides solutions to protect and deliver pharmaceuticals.

Building on our core expertise in plastic injection, injection blow-moulding and high-speed automated assembly, we design, develop and manufacture innovative packaging, including containers and closures, drug delivery devices, metering pumps and valves and medical components to improve patients' health. Totally focused on healthcare, we rely on our regulatory knowledge to support our customers and manufacture in strict compliance with GMPs to meet the highest standards of quality, safety and consistency.

With over 3,000 staff and 15 factories across three continents, Rexam Healthcare is the global leader in healthcare rigid plastic packaging and devices.

ophthalmic

oral

parenteral

dermal/transdermal

nasal/buccal/auricular

pulmonary

We design, develop and manufacture standard and customer-specific solutions.

Ophthalmic

plastic droppers

Containers, tips and closures with a large selection of sizes, features and designs. Rexam is also a pioneer in preservative-free solutions and devices.

NO CONTAMINATION, NO PRESERVATIVES

Novelia™: a preservative-free multidose eyedropper.

Oral

containers and closures

Standard and custom dry and liquid dose form containers matched with an extensive range of closures: child-resistant, tamper evident, with or without desiccant or liners, senior-friendly solutions, innovative dispensing and RFID-enabled containers.

LIGHTWEIGHT SENIOR FRIENDLY CR CLOSURE
Spring-Loc™: lightweight for sustainability.
The quarter-turn feature supports easy opening for seniors.

Nasal, buccal and auricular

sprays and containers

Extensive range of pumps, valves, applicators, rigid bottles and squeezable sprays in all shapes and sizes.

USER-INDEPENDENT and PRESERVATIVE FREE
Advancia™: a response to the highly demanding regulations in nasal delivery.

Pulmonary

inhalation devices

Recognized expertise in developing and manufacturing respiratory devices such as dry powder inhalers and standard valves for pressurized metered dose inhalers.

CONSISTENT and COST-EFFECTIVE
Inhalia™: Rexam's precision metering valves for pMDIs.

innovative packaging

Parenteral devices and plastic containers

Recognized expertise in developing and manufacturing parenteral devices such as injectors and pens, standard safety devices and implanters.

NEEDLESTICK PREVENTION
Safe'n'Sound™: safety device for prefilled syringes.

Dermal and transdermal dispensers and containers

Dispensing systems for topical and systemic dermal applications, airless dispensers, pumps, jars.

ACCURATE DOSING, FULL PROTECTION
Sof'Bag: a simple-to-use but high-performing airless packaging.

Medical and diagnostics

Diagnostics disposables, medical device components and assemblies.

MLx VIALS and BOTTLES
Rigid plastic multilayer injection blow-molded technology.

Prescription

Unparalleled array of regulatory compliant products to provide pharmacists with superior state-of-the-art prescriptionware.

SUSTAINABLE and USER-FRIENDLY SOLUTIONS
Less resin used with the **Opti-Lite™** packer line and best user acknowledged child resistant Rx vial with **1-Clic®**.

Our commitments

We offer global supply

We supply from North America, Europe and Asia with the same GMP quality standards and follow a consistent approach to working with customers.

We lead in quality & efficiency

We place safety, quality and sustainability at the core of our business. We commit to continuous quality improvement that meets and exceeds our customers' expectations.

We empower our people

We promote team work, continuous improvement, recognition and trust to provide the best service to our customers.

We innovate for patients

We listen to patients and develop regulatory compliant solutions to ease their lives.

We deliver your projects On Time In Full

- from concept to commercialization
- design based on user studies and patient insights
- 150 technical experts worldwide committed to your projects
- strong network of technology centers focused on product development and process innovations
- rigorous project governance protocol
- compliant documentation to support regulatory filings

- Production sites
- ★ Technology centers
